

Team: Fakebirds

Demo	3
Technical report	2

4	100%	Outstanding
3	85%	Good, meeting all expectations
2	70%	OK, but some expectations were not fully met
1	50%	Below expectations
0	0%	Missing (or extremely low quality) work

Notes:

- Good to realize the impact of CI compared to the little time required to set it up.
- The report mentions that fillable page components are completed but this wasn't presented during the demo (if you have it implemented but didn't show it in the demo, let me know).
- Add all the required info in the report and add snapshots of GitHub Project board instead of directing the reader to see it there.
- Making the app available offline isn't clear, how will you handle data consistency across different devices?
- Requirements for MVP are reasonable, good luck!
